SPONSORSHIP MATCHING

This dynamic initiative includes a two-day Professional Development Workshop for Teachers (July 10–11) followed by a one-week STEM Camp for 150 children (July 14–18, 2025). We aim to transform learning experiences through hands-on engagement with artificial intelligence, engineering design challenges, social-emotional development, and culturally responsive STEM instruction.

***your support
makes the difference!***

We are inviting corporate and community sponsors to partner with us in making this program equitable and impactful. While families pay a \$65 registration fee, we are seeking matching funds to offset operational costs including materials, meals, transportation, and technology resources.
